Journal of Microscopy

Patron: HER MAJESTY THE QUEEN

Officers and Council 1973-74

President: A. G. E. PEARSE

Vice-Presidents: P. J. STOWARD
G. L'E. TURNER

Hon. Treasurer: B. C. COWEN

Hon. Secretary: P. C. ROBINSON

Ordinary Members of Council:

R. H. M. ALDERSON
G. A. BASSETT
J. A. CHAPMAN
I. M. P. DAWSON
E. A. FOLLETT
B. G. FOOKES

J. R. GARRETT
D. J. GOLDSTEIN
D. G. MURCHISON
B. O. PAYNE
A. W. ROBARDS
P. R. SWANN

Hon. Joint Editors:

B. RALPH
E. R. WEIBEL (Stereology)

P. ECHLIN

Hon. Keeper of Films: D. J. TREVAN

Administrator: P. G. FLEMING

Contents of Vol. 97

Parts 1 and 2

Introduction	1
GASTON DUPOUY. Performance and applications of the Toulouse 3 million volt electron microscope	3
GUY COX and BARRIE JUNIPER. The application of stereo-micrography in the high voltage electron microscope to studies of cell-wall structure and deposition	29
SANFORD N. PALAY and VICTORIA CHAN-PALAY. High voltage electron microscopy of the central nervous system in Golgi preparations	41
A. RAMBOURG, A. MARRAUD and MONIQUE CHRETIEN. Tri-dimensional structure of the forming face of the Golgi apparatus as seen in the high voltage electron microscope after osmium impregnation of the small nerve cells in the semilunar ganglion of the trigeminal nerve	49
PIERRE FAVARD and NINA CARASSO. The preparation and observation of thick biological sections in the high voltage electron microscope	59
AUDREY M. GLAUERT and C. R. MAYO. The study of the three-dimensional structural relationships in connective tissues by high voltage electron microscopy	83
M. J. GORINGE. Current developments in the high voltage electron microscopy of metals and other materials	95
E. A. LITTLE and B. L. EYRE. The geometry of dislocation loops generated in α -iron by 1 MeV electron irradiation at 555°C	107
B. HUDSON and B. E. SHELDON. High voltage electron transmission microscopy of pyrolytic silicon carbide coatings from nuclear fuel particles	113
K. URBAN. Application of high voltage electron microscopy to low-temperature radiation damage studies in metals	121
J. E. HARBOTTLE and D. I. R. NORRIS. High voltage electron microscope studies of void nucleation in nickel	129
C. G. HARRISON and K. D. LEAVER. Micromagnetic structures in single crystal specimens of intermediate thickness studied by Lorentz microscopy	139
G. A. JONES, P. J. GRUNDY and M. J. GORINGE. Observation of bubble domains in the high voltage electron microscope	147
S. G. BURNAY and J. V. SHARP. Defect structure of PAN-based carbon fibres	153
B. F. DYSON and D. E. HENN. The effect of room temperature pre-strain on grain boundary cavitation in Nimonic 80A	165

H. M. FLOWER. High voltage electron microscopy of environmental reactions	171
D. VESELY. <i>In situ</i> deformation of molybdenum thin foils	191
BÖRJE LEHTINEN and WILLIAM ROBERTS. <i>In situ</i> observations of precipitation and recrystallization with a 1 MeV electron microscope	197
D. L. ALLINSON, M. S. LOVEDAY and A. W. O. GOSNOLD. Applications of the NPL Environmental cell for use in the AEI EM7 1 MeV electron microscope	209
R. K. RAY, W. B. HUTCHINSON, F. M. C. BESAG and R. E. SMALLMAN. A high voltage electron microscope study of recrystallization in copper alloys	217
H. NAZIRI, R. PEARCE, M. HENDERSON BROWN and K. F. HALE. <i>In situ</i> superplasticity experiments in the 1 million volt electron microscope	229
MINORU NEMOTO. <i>In situ</i> observation of dissolution of cementite in steel	239
P. R. SWANN, G. THOMAS and N. J. TIGHE. <i>In situ</i> observations of the nitriding of tantalum	249
V. RAMASWAMY, E. P. BUTLER and P. R. SWANN. Direct observation of discontinuous precipitation in Al-28at%Zn	259
Book Review	269

Part 3

G. C. FARNELL and R. B. FLINT. The response of photographic materials to electrons with particular reference to electron micrography	271
H. J. G. GUNDERSEN and R. ØSTERBY. Statistical analysis of transformations leading to normal distribution of measurements of the peripheral glomerular basement membrane	293
GARETH THOMAS and J.-C. LACAZE. Transmission electron microscopy at 2.5 MeV	301
IAN C. CLARKE. Quantitative measurement of human articular surface topography <i>in vitro</i> by profile recorder and stereo-microscopy techniques	309
R. D. G. THEAKSTON and K. A. FLETCHER. A technique for the cytochemical demonstration in the electron microscope of glucose-6-phosphate dehydrogenase activity in erythrocytes of malaria-infected animals	315
C. SCHOCK, R. E. PATTLE and J. M. CREASEY. Methods for electron microscopy of the lamellated osmiophilic bodies of the lung	321
BARRY A. WEAVERS. Combined transmission electron microscopy and X-ray micro-analysis of ultrathin frozen dried sections—an investigation to determine the normal elemental composition of mammalian tissue	331
GUY COX and BARRIE JUNIPER. Electron microscopy of cellulose in entire tissue	343

R. H. TURNER and C. D. GREEN. Preparation of biological material for scanning electron microscopy by critical point drying from water miscible solvents	357
<i>Short Technical Notes</i>	
J. A. CLARKE, P. R. WARD and A. J. SALSURY. High voltage electron microscopy of cellular changes in the wet state	365
HARVEY J. MARCHANT. Processing small delicate biological specimens for scanning electron microscopy	369
DEREK A. FAREBROTHER and NICHOLAS C. WOODS. Permanent preparations of stained whole-body sections using 'Trycolac'	373
BARRY K. NELSON and B. ALLEN FLAXMAN. Use of post-polymerization whole block staining with Azure II to identify <i>in situ</i> embedded cultured cells for electron microscopy	377
MURRAY STEWART. Organic stains for electron microscopy	381
P. L. ANSELL and J. MARSHALL. A method for staining incompletely dehydrated Araldite embedded biological material for light microscopy	385
PAUL R. DESJARDINS and MICHAEL B. BARKLEY. Mica disc supports for particulate specimens for scanning electron microscopy	389
Book Reviews	393

Index of subjects

- Al-28at%Zn, discontinuous precipitation in, 259
 α -iron, geometry of dislocation loops in, 107
Articular surface topography, measurements by profile recorder and stereomicroscopy techniques, 309
- Biological:
 preparation of biological material, for SEM, by critical point drying, 357
 processing of small delicate specimens, 369
 staining incompletely dehydrated material, 385
 thick sections, preparation and observation of, for HVEM, 59
Bubble domains, observation of, in High Voltage Electron Microscopy, 147
- Carbon fibres, defect structure of PAN-based, 153
Cells, technique for identifying *in situ* embedded cultural, 377
Cellular changes in the wet state, with HVEM, 365
Cellulose in entire tissue, 343
Cell-wall structure, 29
Cementite, dissolution of in steel, 239
Critical point drying for SEM, 357
Copper alloys, recrystallization of, in an HVE microscope, 217
Cytochemical demonstration in an electron microscope of glucose-6-phosphate dehydrogenase activity, 315
- Defect structure of PAN-based carbon fibres, 153
Deformation of molybdenum thin foils, 191
- Environmental cell (NPL) application of, in a 1 MeV electron microscope, 209
Environmental reactions, 171
- Glomerular basement membrane, distribution of measurements, 293
Glucose-6-phosphate dehydrogenase in erythrocytes of malaria-infected animals, 315
Golgi apparatus, 3-D structure of forming face in HVEM, 49
Golgi preparations in nervous systems, 41
Grain boundary cavitation in Nimonic 80A, 165
- High Voltage Electron Microscopy:
 application of, to low-temperature radiation damage studies in metals, 121
 bubble domains, 147
 cell wall structure, 29
 central nervous system, in Golgi preparations, 41
 cellular changes in the wet state, 365
 copper alloys, 217
 coatings from nuclear fuel particles, 113
 current developments of, in metals and other materials, 95
 environmental reaction, 171
 nickel, void nucleation, 129
 nuclear fuel particles, 113
 observation of bubble domains, 147
 preparation and observation of thick biological sections, 59
 radiation, low-temperature, damage studies in metals, 121
 recrystallization in copper alloys, 217
 thick biological sections, 59
 3-D structural relations in connective tissues, 83
 3-D structure of forming face of Golgi apparatus in nerve cells, 49
 void nucleation in nickel, 129
- Light microscopy, method for staining incompletely dehydrated material for, 385
Lorentz microscopy, micro-magnetic structures in single crystal specimens, 139
Lung, osmophilic bodies of, 321
- Malaria-infected animals, cytochemical demonstration of glucose-6-phosphate, 315
Mammalian tissue, composition of, 331
Metals:
 HVEM studies of, 95
 HVEM studies in low-temperature radiation damage, 121
MeV:
 1 MeV; AEI, EM7, 209
 in situ observations of precipitation and recrystallization, 197
 in situ super-plasticity experiments, 229
 study of dislocation loops in α -iron, 107
 2.5 MeV; transmission electron microscopy, 301
 3 MeV; performance and applications of the Toulouse, 3
Molybdenum, *in situ* deformation of thin foils, 191
- Nickel, HVEM studies of void nucleation in, 129
Nimonic 80A, 16
Nitriding of tantalum, *in situ* observations of, 249
Nuclear fuel particles, pyrolytic silicon carbide coatings from, 113
- Organic stains for electron microscopy, 381
Osmophilic bodies of the lung, 321
Osmium impregnation of nerve cells of the trigeminal nerve, 49
- PAN-based carbon fibres, defect structure of, 153
Photographic materials, response of, to electrons, 271

- Precipitation:
 - in Al-28at%Zn, 259
 - in situ* observations of, in a 1 MeV electron microscope, 197
- Prestrain, room temperature, in grain boundary cavitation, 165
- Pyrolytic silicon carbide coatings, 113
- Radiation damage, at low temperature, HVEM studies in metals, 121
- Recrystallization:
 - HVEM study of, in copper alloys, 217
 - in situ* observations of, with a 1 MeV electron microscope, 197
- Scanning Electron Microscopy:
 - critical point drying, 357
 - mica disc supports, 389
 - preparation of biological material for, 357
 - processing of small delicate biological specimens for, 369
- Single crystal specimens, micro-magnetic structures in, 139
- Staining, incompletely dehydrated Araldite embedded biological materials, 385
- Stains, organic stains for electron microscopy, 381
- Stereo-microscopy, 29
- Stereo-microscopy of human articular surface topography, 309
- 3-D structure of forming face of the Golgi apparatus, 49
- 3-D structural relationships in connective tissue, 83
- Super-plasticity experiments in HVEM, 229
- Tantalum, *in situ* observations of nitriding of, 249
- Thin foils, *in situ* deformation of molybdenum, 191
- Transmission electron microscopy of frozen sections, 331
- Transmission electron microscopy at 2.5 MeV, 301
- Void nucleation in nickel, 129
- Whole-body sections, permanent preparations of, 373
- Whole-body staining to identify *in situ* embedded cultured cells, 377
- X-ray microanalysis of ultrathin dried frozen sections, 331
